PROJECTS

Image Captioning using Deep Learning

- Developed an image captioning model using CNN and LSTM.
- Used Trained model on image-text datasets to auto-generate relevant captions.

AI Powered Legal Rights Assignment

- Developed an AI-powered web platform for analyzing legal documents and simplifying legal rights interpretation using MERN Stack technologies.
- Implemented automated clause detection, risk identification, and real-time legal analysis features to improve legal awareness, accuracy, and workflow efficiency.

IOT Enabled Smart Item Tracker

- Developed a BLE-based smart tracker using ESP32 for real-time item monitoring.
- Used RSSI-based analysis to predict and alert potential item misplacement.

Amazon Sales Data Analysis Dashboard

- Created a Tableau dashboard analyzing AMAZON Sales Data Analysis.
- GIT HUB - Amazon sales data

CERTIFICATIONS & WORKSHOPS

- Tableau-Data Visualisation.
- Mechanical workshop-KPR college
- Frontend Development Workshop-APPIN Technology
- Active participant in coding platforms: LeetCode, HackerRank.
